

ANNEX I

GRANT AWARDING CRITERIA VM

1. Relevance to TREASURE (up to 40)

- Relevance (up to 20) Scientific excellence and novelty of the proposed VM, with a focus on secondary data analysis and data management.
- Working Groups (WG) (up to 20) The application addresses the objectives of TREASURE and contributes to the work of analysis of secondary data within one or more WGs.

2. Quality of work plan (up to 20)

- Clear workplan (up to 10) The clarity of the proposal, time plan and described activities.
- Outcomes (up to 5) Feasibility of the approach, realistic planning of the application, and outputs.
- Dissemination (up to 5) The ability of the VM applicant to successfully complete the proposed VM and disseminate relevant outputs (scientific articles, conference contributions, or others).

3. Applicant (up to 40)

- Younger research (10 points) Under 40 years old

- ITC Applicant (10 points) Affiliated to an institution located at an ITC country.
- Applicant' CV (up to 20) Research career in line with the work proposal to be carried out. Experience in data organization in European projects, data transcription, organization and management of databases, statistical analysis and harmonization will be valued.

The selection will follow the COST policies on inclusiveness (gender, age, geography).

The final ranking will be approved by the Grant Awarding Coordinator and Action Chair.

To avoid conflict of interest when evaluating the applications, applicants who either work at the same place or will visit the same place of a committee member will not be evaluated by that member.
